

Jefferson County, NY 1997 8-Hour Ozone Non-Attainment Area Transportation/Air Quality Conformity Determination

**Watertown Jefferson County Area Transportation Council
2020-2024 Transportation Improvement Program
and 2045 Long-Range Transportation Plan**

**Capital Program of Transportation Projects
In the Non-Urbanized Portions of Jefferson County**

Prepared by:

**NYSDOT Region 7 Planning and WJCTC Staff
May 1, 2019**

Executive Summary

As part of its transportation planning process, the Watertown Jefferson County Area Transportation Council (WJCTC) and the New York State Department of Transportation completed the transportation conformity process for the WJCTC 2045 Long Range Transportation Plan (LRTP), 2020-2024 Transportation Improvement Program (TIP) and the Capital Program of Transportation Projects in the non-urban remainder of the Jefferson County, NY ozone nonattainment area. This report documents that the 2045 LRTP, 2020-2024 TIP and Capital Program meet the federal transportation conformity requirements in 40 CFR Part 93.

Clean Air Act (CAA) section 176(c) (42 U.S.C. 7506(c)) requires that federally funded or approved highway and transit activities are consistent with (“conform to”) the purpose of the State Implementation Plan (SIP). Conformity to the purpose of the SIP means that transportation activities will not cause or contribute to new air quality violations, worsen existing violations, or delay timely attainment of the relevant NAAQS or any interim milestones. 42 U.S.C. 7506(c)(1). EPA’s transportation conformity rules establish the criteria and procedures for determining whether metropolitan transportation plans, transportation improvement programs (TIPs), and federally supported highway and transit projects conform to the SIP. 40 CFR Parts 51.390 and 93.

On February 16, 2018, the United States Court of Appeals for the District of Columbia Circuit in *South Coast Air Quality Mgmt. District v. EPA* (“*South Coast II*,” 882 F.3d 1138) held that transportation conformity determinations must be made in areas that were either nonattainment or maintenance for the 1997 ozone national ambient air quality standard (NAAQS) and attainment for the 2008 ozone NAAQS when the 1997 ozone NAAQS was revoked. These conformity determinations are required in these areas after February 16, 2019. Jefferson County was in “nonattainment” status at the time of the 1997 ozone NAAQS revocation on April 6, 2015 and was also designated attainment for the 2008 ozone NAAQS on May 21, 2012. Therefore, per the *South Coast II* decision, this conformity determination is being made for the 1997 ozone NAAQS on the LRTP, TIP and relevant Capital Program of Transportation Projects.

This conformity determination was completed consistent with CAA requirements, existing associated regulations at 40 CFR Parts 51.390 and 93, and the *South Coast II* decision, according to EPA’s *Transportation Conformity Guidance for the South Coast II Court Decision* issued on November 29, 2018.

Transportation Conformity Overview

The concept of transportation conformity was introduced in the Clean Air Act (CAA) of 1977, which included a provision to ensure that transportation investments conform to a State implementation plan (SIP) for meeting the Federal air quality standards. Conformity requirements were made substantially more rigorous in the CAA Amendments of 1990. The transportation conformity regulations that detail implementation of the CAA requirements were first issued in November 1993, and have been amended several times. The regulations establish the criteria and procedures for transportation agencies to demonstrate that air pollutant emissions from metropolitan transportation plans, transportation improvement programs and projects are consistent with (“conform to”) the State’s air quality goals in the SIP. This document has been prepared for State and local officials who are involved in decision making on transportation investments.

Transportation conformity is required under CAA Section 176(c) to ensure that Federally-supported transportation activities are consistent with (“conform to”) the purpose of a State’s SIP. Transportation conformity establishes the framework for improving air quality to protect public health and the environment. Conformity to the purpose of the SIP means Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) funding and approvals are given to highway and transit activities that will not cause new air quality violations, worsen existing air quality violations, or delay timely attainment of the relevant air quality standard, or any interim milestone.

On June 15, 2004, the United States Environmental Protection Agency (EPA) designated Jefferson County as being in nonattainment status for the 1997 8-hour ozone standard (0.08 parts per million). This designation was based on the results of ambient air monitoring data collected by the New York State Department of Environmental Conservation from calendar years 2001-2003. These data established an 8-hour ozone “design value” of 0.097 ppm for the area. The current design value for the area, based on 2016-2018 data, is 0.067 ppm.

On July 20, 2012, the USEPA designated the Jefferson County, NY attainment for the 2008 ozone standard (0.075 ppm). The area was designated attainment for the 2015 ozone standard (0.070ppm) on January 16, 2018.

Per the *South Coast II* court decision, beginning February 16, 2019, a transportation conformity determination for the 1997 ozone NAAQS is required in 1997 ozone NAAQS nonattainment and maintenance areas, including the Jefferson County, NY area. This conformity determination report will address transportation conformity for the 2020-2024 WJTC TIP & the 2045 LRTP and the surrounding non-urban portion of the county. Once the FHWA/FTA makes its 1997 ozone NAAQS conformity determination, conformity will be required at least every four years.

Latest Planning Assumptions

The use of latest planning assumptions in 40 CFR 93.110 of the conformity rule generally apply to regional emissions analyses. In the 1997 ozone NAAQS areas, the use of latest planning assumptions requirement applies to assumptions about transportation control measures (TCMs) in an approved SIP. There are no TCMs in any SIP in the Jefferson County, NY area. Thus, the latest planning assumption requirement is not applicable for this conformity determination.

Consultation

The consultation requirements in 40 CFR 93.112 and 6 NYCRR Part 240 were addressed both for interagency consultation and public consultation.

Per the New York State Transportation Conformity SIP, as codified in Chapter 6 of the New York Codes Rules and Regulations (6 NYCRR) Part 240, interagency consultation was conducted with the NYSDEC,

NYSDOT, FHWA, FTA and USEPA. Representatives of these agencies comprise the Interagency Consultation Group (ICG) for air quality conformity in New York State.

On April 23, 2019 the ICG concurred with the classification of projects in the WJCTC TIP and Plan and the Capital Program of Transportation Projects in the remainder of Jefferson County. No non-exempt projects identified through the consultation process. All projects on the TIP, LRTP and non-urban Capital Program are exempt. See project listing in Appendix A.

This document was provided in draft form to the ICG on April 12, 2019 and all comments received were incorporated.

The public was provided an opportunity to review and comment on the draft conformity determination and supporting documentation from May 3, 2019 to June 4, 2019. The documentation was made available for public review at the WJCTC Office and the WJCTC website.

Resolution of comments to be included in the final documentation.

Timely Implementation of TCMs

There are no TCMs in the SIP for the Jefferson County, NY 1997 ozone nonattainment area.

Fiscal Constraint

Transportation conformity requirements in 40 CFR 93.108 state that transportation plans and TIPs must be fiscally constrained consistent with DOT's metropolitan planning regulations at 23 CFR part 450. The WJCTC 2045 transportation plan and 2020-2024 TIP are fiscally constrained, as demonstrated in Chapter 6 of the 2045 LRTP and Section 3 of the 2020- 2024 TIP.

Conclusion

All projects in the Jefferson County, NY 1997 ozone nonattainment area are exempt as per the Transportation Conformity Rule. The conformity determination process completed for the 2020-2024 WJCTC TIP and 2045 LRTP demonstrates that these planning documents meet the Clean Air Act and transportation conformity requirements for the 1997 ozone NAAQS. The signed resolutions adopting this conformity determination are included in Appendix B.

Resolution 6-2019

Policy Committee Resolution approving Air Quality Conformity Determination

WHEREAS, the Watertown Jefferson County Area Transportation Council (WJCTC) is designated by the Governor of New York State as the Metropolitan Planning Organization (MPO) for the Watertown Urbanized Area in Jefferson County; and

WHEREAS, the Planning and Programming area of the Watertown Jefferson County Area Transportation Council includes the entirety of Jefferson County; and

WHEREAS, by virtue of inclusion of the County of Jefferson within its Planning and Programming Area, WJCTC is considered to be a part of the Jefferson County Non-Attainment area for the 1997 8-hour ozone standard and thus a determination of conformity with the Clean Air Act State Implementation Plan is required as part of the WJCTC 2019-2024 TIP and the 2045 Long Range Transportation Plan per 40 CFR Part 93; and

WHEREAS, the WJCTC has assigned responsibility for approving the conformity determination statement, developed by the WJCTC and NYSDOT, in consultation with the New York State Interagency Consultation Group, to its Technical Advisory Committee; and

WHEREAS, the draft conformity determination concludes that all transportation plans and programs within the Jefferson County Non-Attainment Area, including the WJCTC 2020-2024 TIP and 2045 Long Range Transportation Plan, are in conformity with the State Implementation Plan in accordance with transportation conformity rules published by the United States Environmental Protection Agency and the New York State Department of Environmental Conservation; and

WHEREAS, the draft conformity determination has undergone a 30-day public comment period that closed on [INSERT MONTH DATE 2019] with no comments received;

NOW, THEREFORE, BE IT RESOLVED, that WJCTC hereby approves the Jefferson County 1997 8-Hour Ozone Non-Attainment Area Transportation/Air Quality Conformity Determination by way of votes received on XX, 2019.

CERTIFICATION OF RESOLUTION

I, the undersigned, duly elected chair of the Watertown Jefferson County Area Transportation Council (WJCTC), do hereby certify that the foregoing is a true and correct copy of WJCTC Policy Committee Resolution 6-2019, adopted by consensus this XX day of XX, 2019.

Chair
